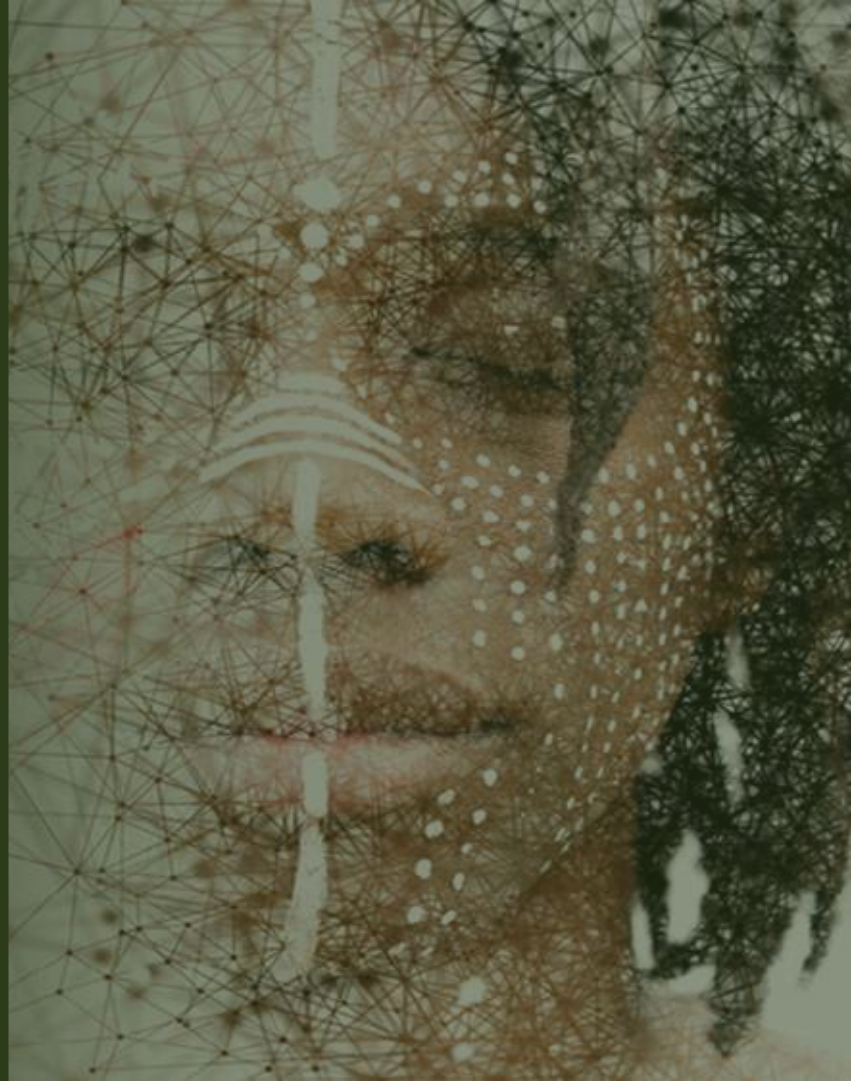
GENTLE EARTH PROJECT

Earth's Legacy, Our Promise.

Introductory Presentation

UAE Ministry of Environment & Climate Change



ABOUT US

Built to Stay.

Gentle Earth Project is a DIFC-registered, for-profit impact platform designing and implementing large-scale ecosystem restoration and circular economic development — in partnership with governments and local communities around the world.

Founded by Sahara Sunday Spain, GEP was built on one central conviction: that well-intentioned development without structural accountability leaves communities no better off. Impact must be designed to last.

DIFC Registered

For-Profit, Impact-Driven

Carbon & Biodiversity

Science-Based

Regenerative Engineering

Mission & Vision

OUR MISSION

Restore Ecosystems. Uplift Communities.

To restore degraded ecosystems and uplift communities by developing science-based, regenerative environmental solutions that generate measurable social and ecological impact.

We work with governments, local partners, and investors to implement scalable restoration and sustainable land-use initiatives that enhance biodiversity, improve livelihoods, and catalyse long-term climate resilience.

OUR VISION

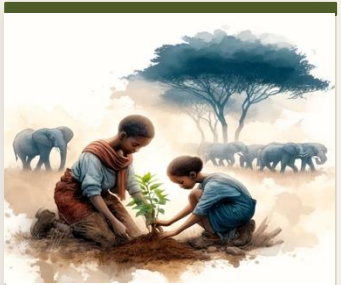
Technology & Nature in Synergy.

A world where technological advancement and environmental regeneration operate in synergy — enabling societies to grow while strengthening the ecosystems that sustain them.

We believe humanity can move beyond coexistence toward responsible custodianship of the planet, using innovation, data, and long-term planning to regenerate landscapes and secure a resilient future.

OUR EXPERTISE

Ecosystem Restoration at Sovereign Scale



Reforestation

Restoring degraded primary and secondary forest ecosystems through science-based planting, monitoring, and community stewardship.

Afforestation

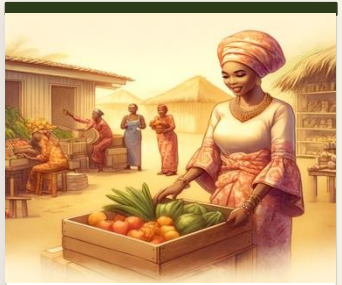
Establishing new forest cover on degraded or barren land, integrating biodiversity, watershed protection, and rural livelihood models.

Mangrove Delta

Coastal blue carbon restoration combining mangrove rehabilitation with marine biodiversity recovery and community coastal resilience.

Reef Forestation

Marine ecosystem restoration targeting coral and reef recovery — generating blue carbon credits and protecting coastal biodiversity.



Circular Economy

Integrating sustainable economic development into restoration landscapes — ensuring communities remain invested in the long-term health of the land.

ACTIVE PIPELINE

Current Projects

Sovereign-scale restoration programmes currently in development and early implementation.

ACTIVE

D.R. Congo

00.0M ha SECURED

Massive primary reforestation across the Congo Basin — the second-largest tropical rainforest on Earth. A multi-phase programme restoring degraded primary forest corridors, supporting local communities, and generating durable carbon and biodiversity outcomes.

ACTIVE

Ethiopia

00.0M ha SECURED

Large-scale afforestation and reforestation across degraded highland and lowland landscapes. Integrating food security, rural livelihoods, and watershed restoration in alignment with Ethiopia's national climate resilience agenda.

ACTIVE

Haiti

00.0M ha SECURED

Integrated reforestation and circular economic development in one of the most severely deforested territories in the Caribbean. Targeting watershed recovery, coastal protection, and long-term community stewardship.

PIPELINE

Upcoming Projects

Projects in active origination and pre-development across four continents.

UPCOMING

Côte d'Ivoire

00.0M ha SECURED

Primary forest restoration in West Africa's most biodiverse landscape — targeting cocoa belt degradation and coastal ecosystem recovery.

UPCOMING

Nepal

00.0M ha SECURED

High-altitude forest and watershed restoration targeting biodiversity corridors and climate-vulnerable mountain communities.

UPCOMING

Armenia

00.0M ha SECURED

Afforestation and dryland restoration aligned with Armenia's national reforestation commitments and rural economic development.

UPCOMING

Lebanon

00.0M ha SECURED

Reforestation and coastal ecosystem recovery targeting the historic cedar forest regions and Mediterranean coastal biodiversity zones.

"Every hectare we restore, we restore under the UAE's name."

GEP & THE UAE

A UAE Company with Global Impact.

- **Registered in the DIFC, Dubai**

  GEP is a UAE company — incorporated and governed under the Dubai International Financial Centre. Our operations, assets, and credentials are UAE-based.

- **UAE-Attributed Carbon Assets**

  The carbon credits and ecological outcomes generated by GEP's global projects are assets originating from a UAE-registered entity — strengthening the UAE's position in international carbon markets.

- **Championing UAE on the World Stage**

  From the Congo Basin to the Himalayas, GEP carries the UAE's institutional identity into some of the world's most critical restoration landscapes — projecting UAE environmental leadership globally.

- **Aligned with UAE Net Zero 2050**

  GEP's work directly supports the UAE's national and international climate commitments — amplifying the legacy of COP28 and the UAE's role as a global climate leader.

Why the UAE Ministry & GEP Belong Together

Environmental Leadership

- UAE Net Zero 2050 — GEP's projects generate verifiable carbon credits that count toward UAE climate targets.
- Post-COP28 momentum — GEP extends the UAE's environmental leadership legacy into active global restoration.
- Biodiversity commitments — GEP's multi-ecosystem approach directly advances UAE biodiversity targets.

Economic & Strategic Value

- UAE-originated carbon assets — credits from a DIFC entity command premium positioning in global markets.
- New asset class — natural capital is an emerging sovereign asset; early positioning creates long-term advantage.
- DIFC ecosystem — GEP operates within Dubai's world-class financial and regulatory framework.

Global Reputation

- UAE's name on the world's most critical landscapes — from Congo to the Himalayas.
- GEP's science-based methodology ensures credibility and rigour behind every headline.
- Long-term custodianship model — not a one-off gesture, but a lasting environmental legacy.

GENTLE EARTH PROJECT

Thank you.

We welcome the opportunity to explore a formal partnership with the UAE Ministry of Environment — and to discuss how Gentle Earth Project can serve as a vehicle for UAE environmental leadership on the world stage.
